Filtration services

## Filter cloths

Based on decades of experience, we are able to offer our customers unsurpassed filter cloth quality, improved availability and optimized process results for Larox overpressure and vacuum filters.

Filter media is an essential part of the filtration process. Our filter cloths are tailored to perform with Larox filters. By selecting our filter cloths as filter media, customers can ensure optimized performance and process results for each application and filter. We offer a comprehensive service network with committed customer support. Choosing our filter cloths will secure access to our product expertise, process support and tailored cloth options to suite your process and conditions.

#### **Guaranteed quality**

All Metso parts and components are designed, tested and manufactured to match the original OEM specifications to ensure maximum quality. The only way to have peace of mind about the performance of your equipment is to replace parts and components with an OEM replacement which fit your filter perfectly and deliver optimal performance.

#### **Optimal performance**

Over time, filter cloths clogg and limit performance. By replacing your cloth with Metso OEM filter cloths designed for the specific application,

you can expect the performance of the filter to continue at optimal levels.

#### **Benefits**

- Perfectly engineered to fit Larox filters
- Optimized throughput and filtrate clarity
- Excellent cake release & resistance to blinding
- Stretch, shrink & higher abrasion resistance
- Extended life & higher filter availability

## Longer lifespan

We invest each year in our in-house research and development centers. Our raw materials and cloths undergo rigorous testing to ensure the manufacturing processes, materials and quality control are of the highest standards.

Our genuine parts, therefore, outperform imitations and with a longer lifetime, saving time and costs.

## Support and response

Purchasing from Metso the OEM provider, gives you access to a wide variety of technical and global engineering support.

Response times to obtaining OEM spares is quick as less time is required to identify parts.

We also provide testing services to ensure you receive the optimal cloth according to your application and process requirements.

## Return on investment

The parts we supply are designed and made with precision, specified to meet the demands and operating conditions which will increase the life of your equipment. The reduced downtime and continued performance of your plant will save costs over the lifetime of your plant.

Using genuine parts also means there will be fewer subsequent failures, resulting in reduced inventory costs for holding spares and improve you repair cycle forecast.

## Warranty and safety

One of the most important benefits you receive with our spare parts is manufacturer warranty that is applied according to Metso terms and conditions for spare parts.
